HIS EXCELLENCY
PRESIDENT FERDINAND E. MARCOS
Chairman

GERARDO P. SICAT
Director General

NATIONAL CENSUS AND STATISTICS OFFICE *

TITO A. MIJARES
Acting Executive Director & Civil Registrar-General

* At the time this final provincial report went to press, Presidential Decree No. 418 was issue (March 20, 1974) reconstituting the Bureau of the Census and Statistics into a new office under the administrative supervision of the National Economic and Development Authority.

PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Population and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fertility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explanatory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

Other reports to be published are the Special Reports on: a) Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970; the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households; and by type of building cross-classified by type of activity, industry and sex of heads of households.

We are deeply thankful to His Excellency, the President of the Philippines, for authorizing the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and cooperation of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census forms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Manila, Philippines
April, 1974

14. Number Of Households In Occupied Dwelling Units By Type Of Cooking Fuel Used, Urban And Rural, By Municipality: 1970	490
15. Number Of Households In Occupied Dwelling Units By Type Of Toilet Facilities Used, Urban And Rural, By Municipality: 1970	491

EXPLANATORY TEXT

Part I — POPULATION

INTRODUCTION

The 1970 Census of Population taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employees, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;

PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and

PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of constantly referring to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the use of advanced data within a relatively shorter period. The best available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970 as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of

Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Assistance on Community Development; Bureau of Private Schools; Bureau of Public Schools; Budget Commission; Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular Bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the Bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-in-charge who supervised the field operations assisted by well-trained central office personnel. For the entire country, there were 2,297 public school principal teachers designated as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-Chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist, as members.

EXPLANATORY TEXT

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1,200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's were split into two or more parts, each part assigned to one enumerator.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population was done by personal interview. Each enumerator visited the households within his ED of assignment and obtained the information called for in the population schedules. If the household was an ordinary household (non-sample), the head or any responsible member was interviewed using PH Form 2; if a sample household, the respondent was interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion; place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for ever-married women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the Bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 especially selected and trained teacher-enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample household schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start.

CONTENT AND COVERAGE

This provincial report is presented in four (4) parts and comprises fifty-nine (59) tables, as follows:

	No. of Tables
Number of inhabitants	6
Economic characteristics	20
Social characteristics	19
Marital status	3
Education and literacy	7
Citizenship	2
Mother tongue	3
Ability to speak Pilipino, English and Spanish	2
Religion	2
Demographic characteristics	14
Fertility	8
Migration	6

Tables based on a 5 percent sample may contain figures in the distribution of a certain characteristic which do not correspond to the figures in the distribution of the same characteristic in the tables on a 100 percent basis. However, the totals in the tables based on a 5 percent sample and on 100 percent are the same.

EXPLANATORY TEXT

The coverage of the population enumerated in the census and the size of the sample are shown below:

Topic	Table No.	Coverage	Size of sample (percent)
I. Number of Inhabitants	1-5	Household and institutional population	100
	6	Household population	5
		Institutional population	100
II. Economic characteristics	1-20	Household population	5
III. Social characteristics			
A. Marital status	1-2	Household and institutional population	100
	3	Household population	100
B. Education and Literacy	4-5	Household population	5
		Institutional population	100
	6-10	Household and institutional population	100
C. Others	11-15	Household and institutional population	100
	16-19	Household population	5
		Institutional population	100
IV. Demographic characteristics			
A. Fertility	1-8	Household population	5
B. Migration	9-14	Household population	5

EXPLANATORY TEXT

On the other hand, the items of data collected and percent of the population for which these items were asked are indicated below:

POPULATION ITEMS OF DATA COLLECTED

P 34	Number of children now living	—	x	—

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration—

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- I. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- II. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week, and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming/fishing.

In the 1960 census the following areas were considered urban:

- I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- II. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the population.
- IV. All other poblaciones having a population of at least 2,500 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Some household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance.

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as his home or the place where he usually sleeps.

EXPLANATORY TEXT

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 a.m. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 1. on vacation;
 2. on business;
 3. schooling below college level;
 4. confined in a hospital, if confinement is not more than six months;
 5. in the Armed Forces, if their absence is not more than six months;
 6. in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employees and domestics who live with the household, or at least sleep in the same unit;
- e. Filipino employees and domestics employed by a foreign family, who will not be enumerated in their usual place of residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students, or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the **conjugal** family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970 in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. **Single** — denotes a person who has never been married.
- b. **Married** — denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- c. **Widowed** — denotes a married person whose spouse died and up to the census taking has not remarried.
- d. **Separated** — denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. **Divorced** — denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered married life or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union the date at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (Ilongo-Visayan), Ilocano, Bicol, Samar-Leyte, Pampango and Pangasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple message in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools, which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dress-making, beauty culture, hair science, watch repairing, or motor-vehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, infant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is gained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and trade knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertness in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either (a) working for pay or for profit or without pay in the family farm or enterprise; (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who does housekeeping chores in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others".

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fencing the yard, etc., in their own homes.

CLASS OF WORKER

(1) The allocation of a person to a particular class of worker category is basically independent of the occupation or industry in which he works.

(2) The class of worker information refers to the same job described in the occupation and industry column. The classification by class of worker consists of the following categories:

- 1. Wage and salary worker
 - (a) Private employe—working for a private employer for wage, salary, commission, tips, etc.
 - (b) Government employe—working for government or government owned or controlled corporations.
- 2. Own business
 - (a) Self-employed—working in one's business, farm, profession or trade for profit or fee, without paid employes.
 - (b) Employer—working in one's business, farm, profession or trade for profit or fee, with one or more paid employes.
 - (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPLANATORY TEXT

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by the person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person works during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore, persons looking for work for the first time do not have any industry and are separately classified.

Part II — HOUSING

INTRODUCTION

The Census of Housing was taken simultaneously with the Census of Population on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The Census of Housing is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence, were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No. 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

Item No.	A. Characteristics of building:
1	Type of building or house
2	Number of dwelling units in building or house: occupied-unoccupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
	B. Characteristics of dwelling unit:
6	Number of rooms
7	Number of households and persons occupying dwelling unit
8	Type of tenure
	C. Household conveniences
9	Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
12	Type of cooking fuel
13	Type of lighting
14	Source of drinking water
15	Type of toilet facilities

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household in the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

1. Single house — a complete structure intended for a single family or household.
2. Duplex — a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
3. Apartment or accessoria — a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accessoria is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
4. Barong-barong — a shack or makeshift shelter, usually built with light materials.
5. Commercial — a building used for trade and commerce such as a store or an office building.
6. Industrial — a building used for processing or manufacturing, such as a factory plant.
7. Agricultural — any structure used for agriculture purposes, such as barn, warehouse, etc.
8. Institutional — a hospital, school, church, etc.
9. Others — any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or private residences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

1. Galvanized iron, including aluminum and fiberglass
2. Asbestos
3. Concrete, tile
4. Cogon
5. Nipa, anahaw, buri
6. Others (canvas, salvaged materials, billboards)

CONSTRUCTION OF WALL

The kinds of materials used in the construction of the wall are:

1. Concrete, including hollow blocks, adobe stone, bricks, etc.
2. Galvanized iron, including aluminum
3. Wood, including plywood
4. Bamboo, including sawali
5. Nipa, anahaw, buri
6. Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

EXPLANATORY TEXT

TYPE OF TENURE

The type of tenure may be any of the following:

1. Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
2. Owned and part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
3. Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
5. Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
6. Rented and a part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.
7. Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SETS

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working order and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

1. Electricity — from whatever source of power unit
2. Kerosene (gaas) — liquid form
3. Gas (liquefied petroleum) — piped or in cylinder (Esso, Gasul, Rockgas, Shellane, Manila Gas, etc.)
4. Wood, including sawdust
5. Charcoal
6. Others — any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The types of lighting are:

1. Electricity — from whatever source of power unit
2. Kerosene (gaas) — whatever the nature of lamp used
3. Oil — any kind of vegetable (or animal) oil other than kerosene
4. Others — any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

1. Piped water system (Municipal, NAWASA)
2. Artesian well
3. Pump
4. Open well
5. Spring
6. Rain water
7. Lake, river, stream, etc.

TYPE OF TOILET FACILITIES

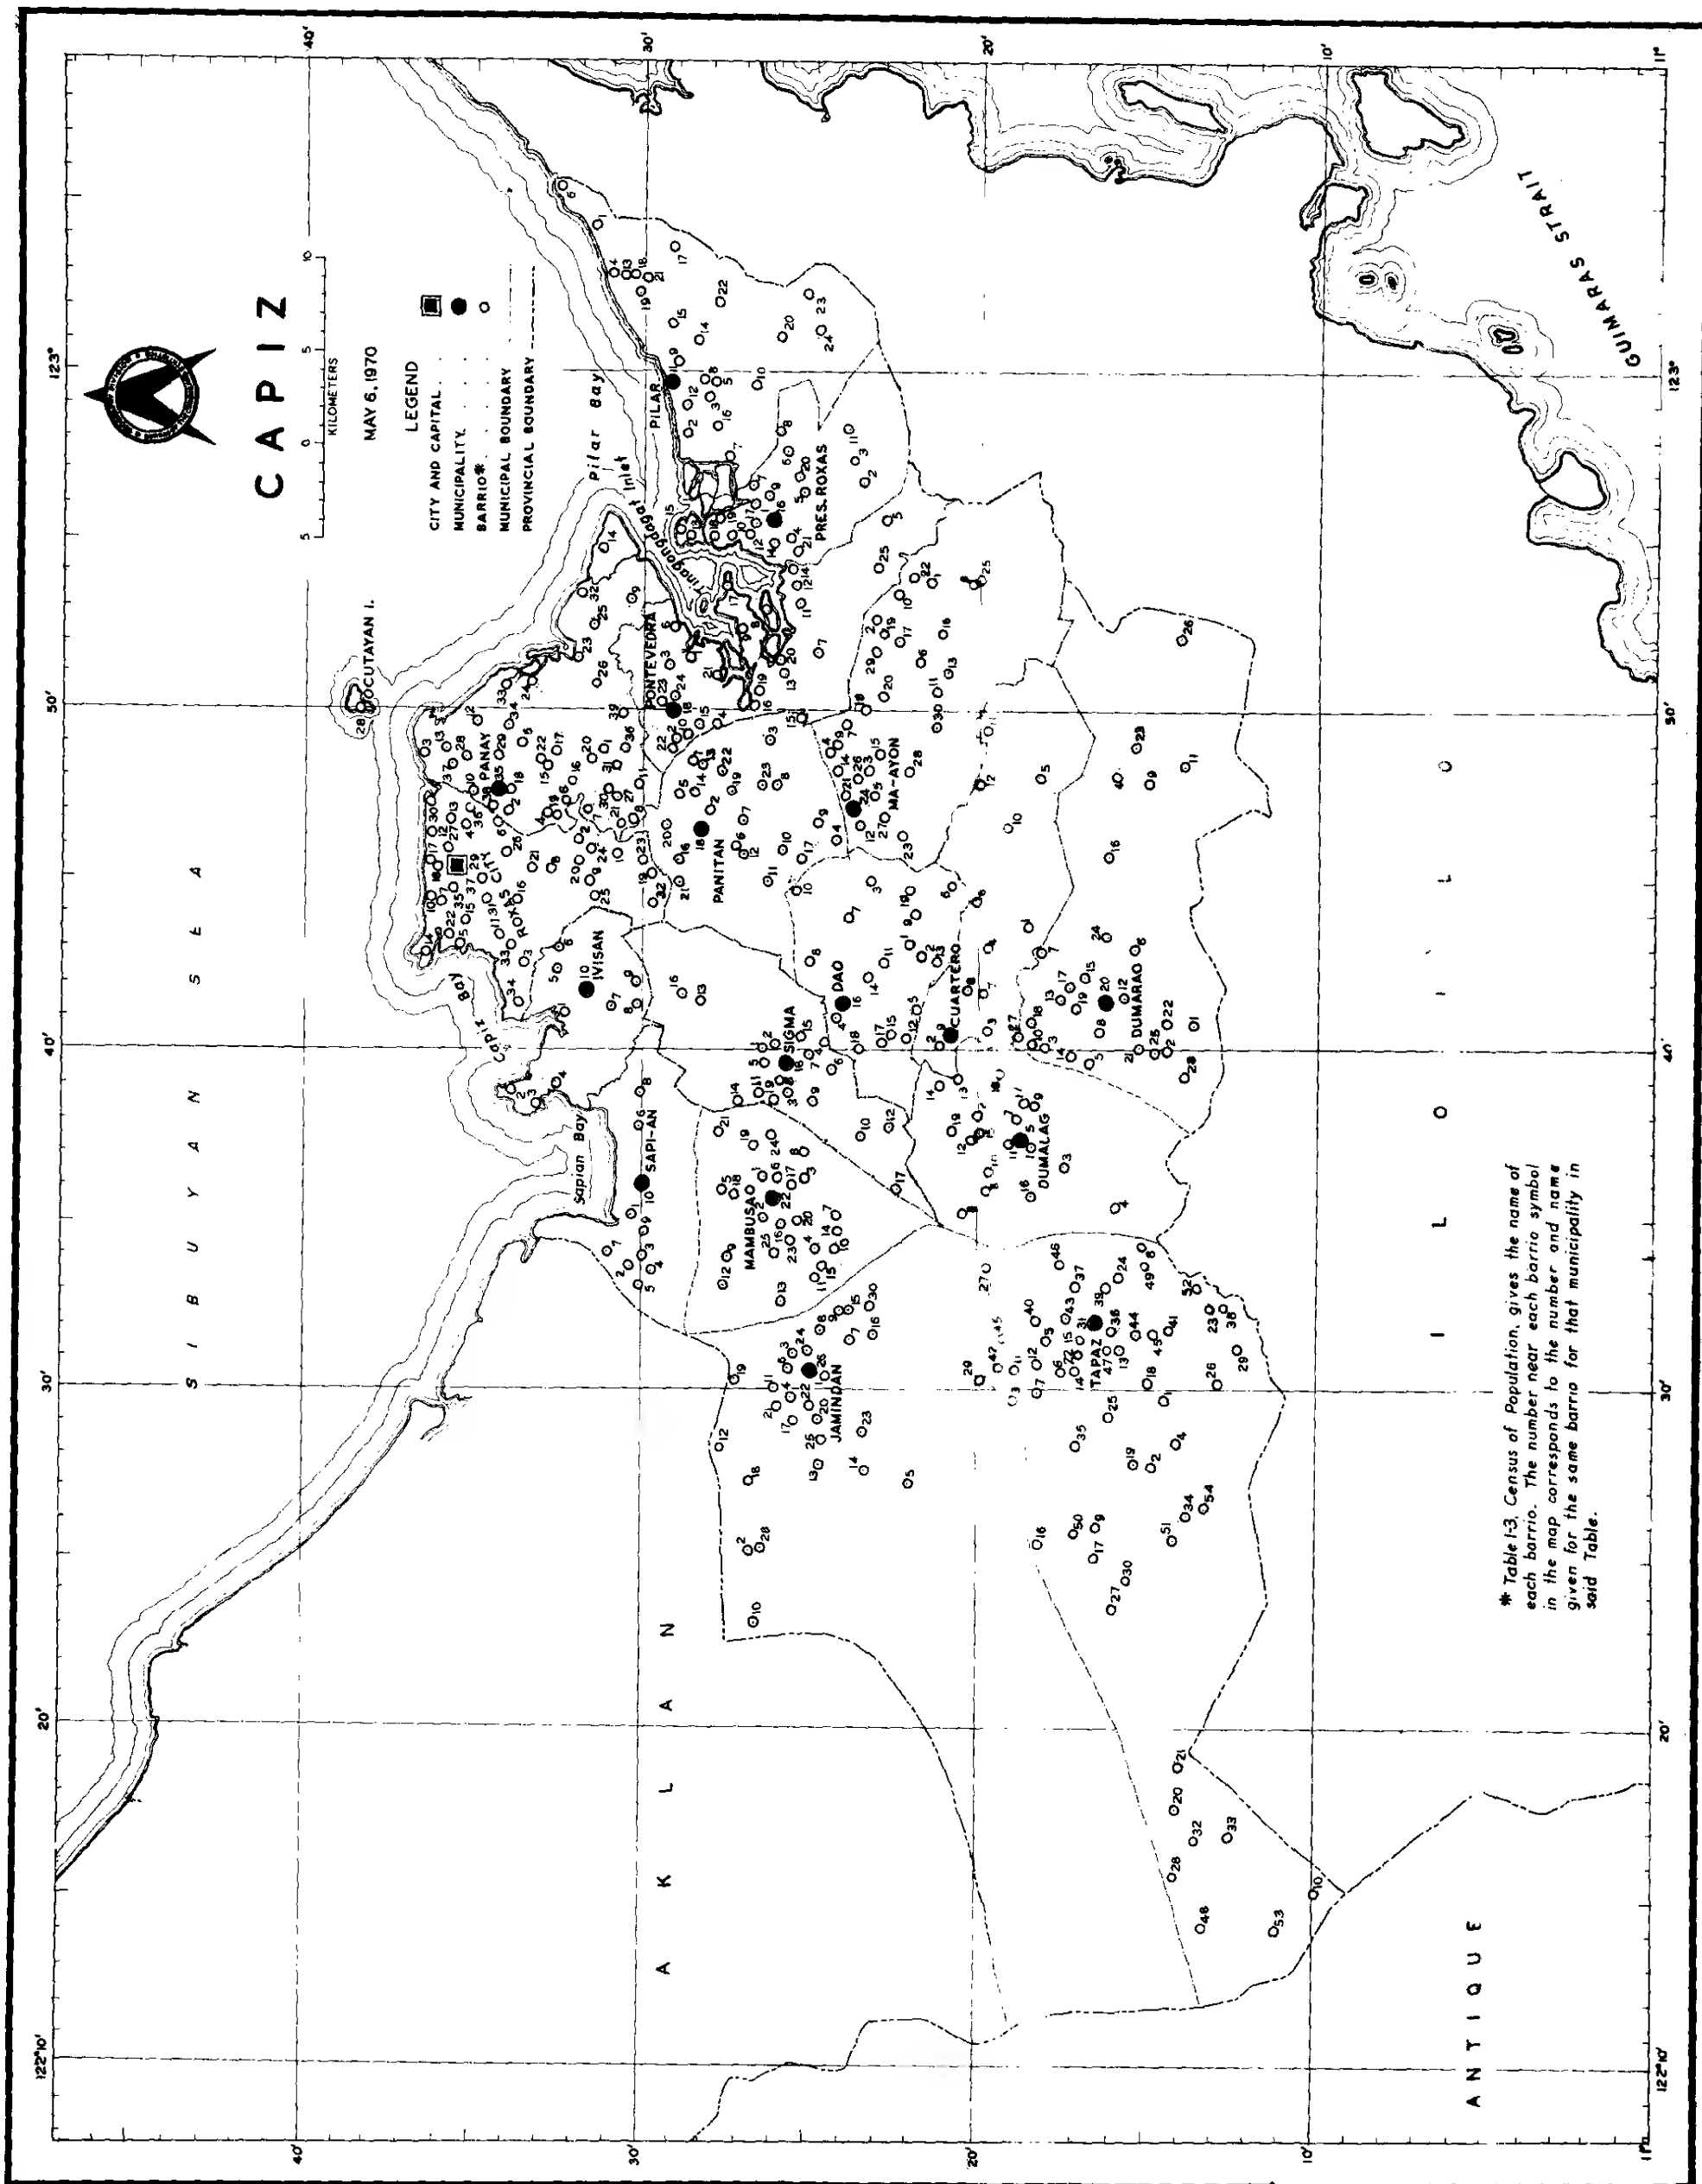

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

1. Flush system/water-sealed — Water-sealed toilet is the type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals in bottom from the pipe leading to the depository. In effect, the flush toilet is one type of water-sealed toilet.

Another type of water-sealed toilet is the cement bowl with a structure quite similar to an enamel bowl. It is connected to a septic tank or concrete depository or sometimes drum or closed pit.

The other kind of cement bowl is constructed much lower than the above-mentioned type to conform to certain Filipino toilet habits.

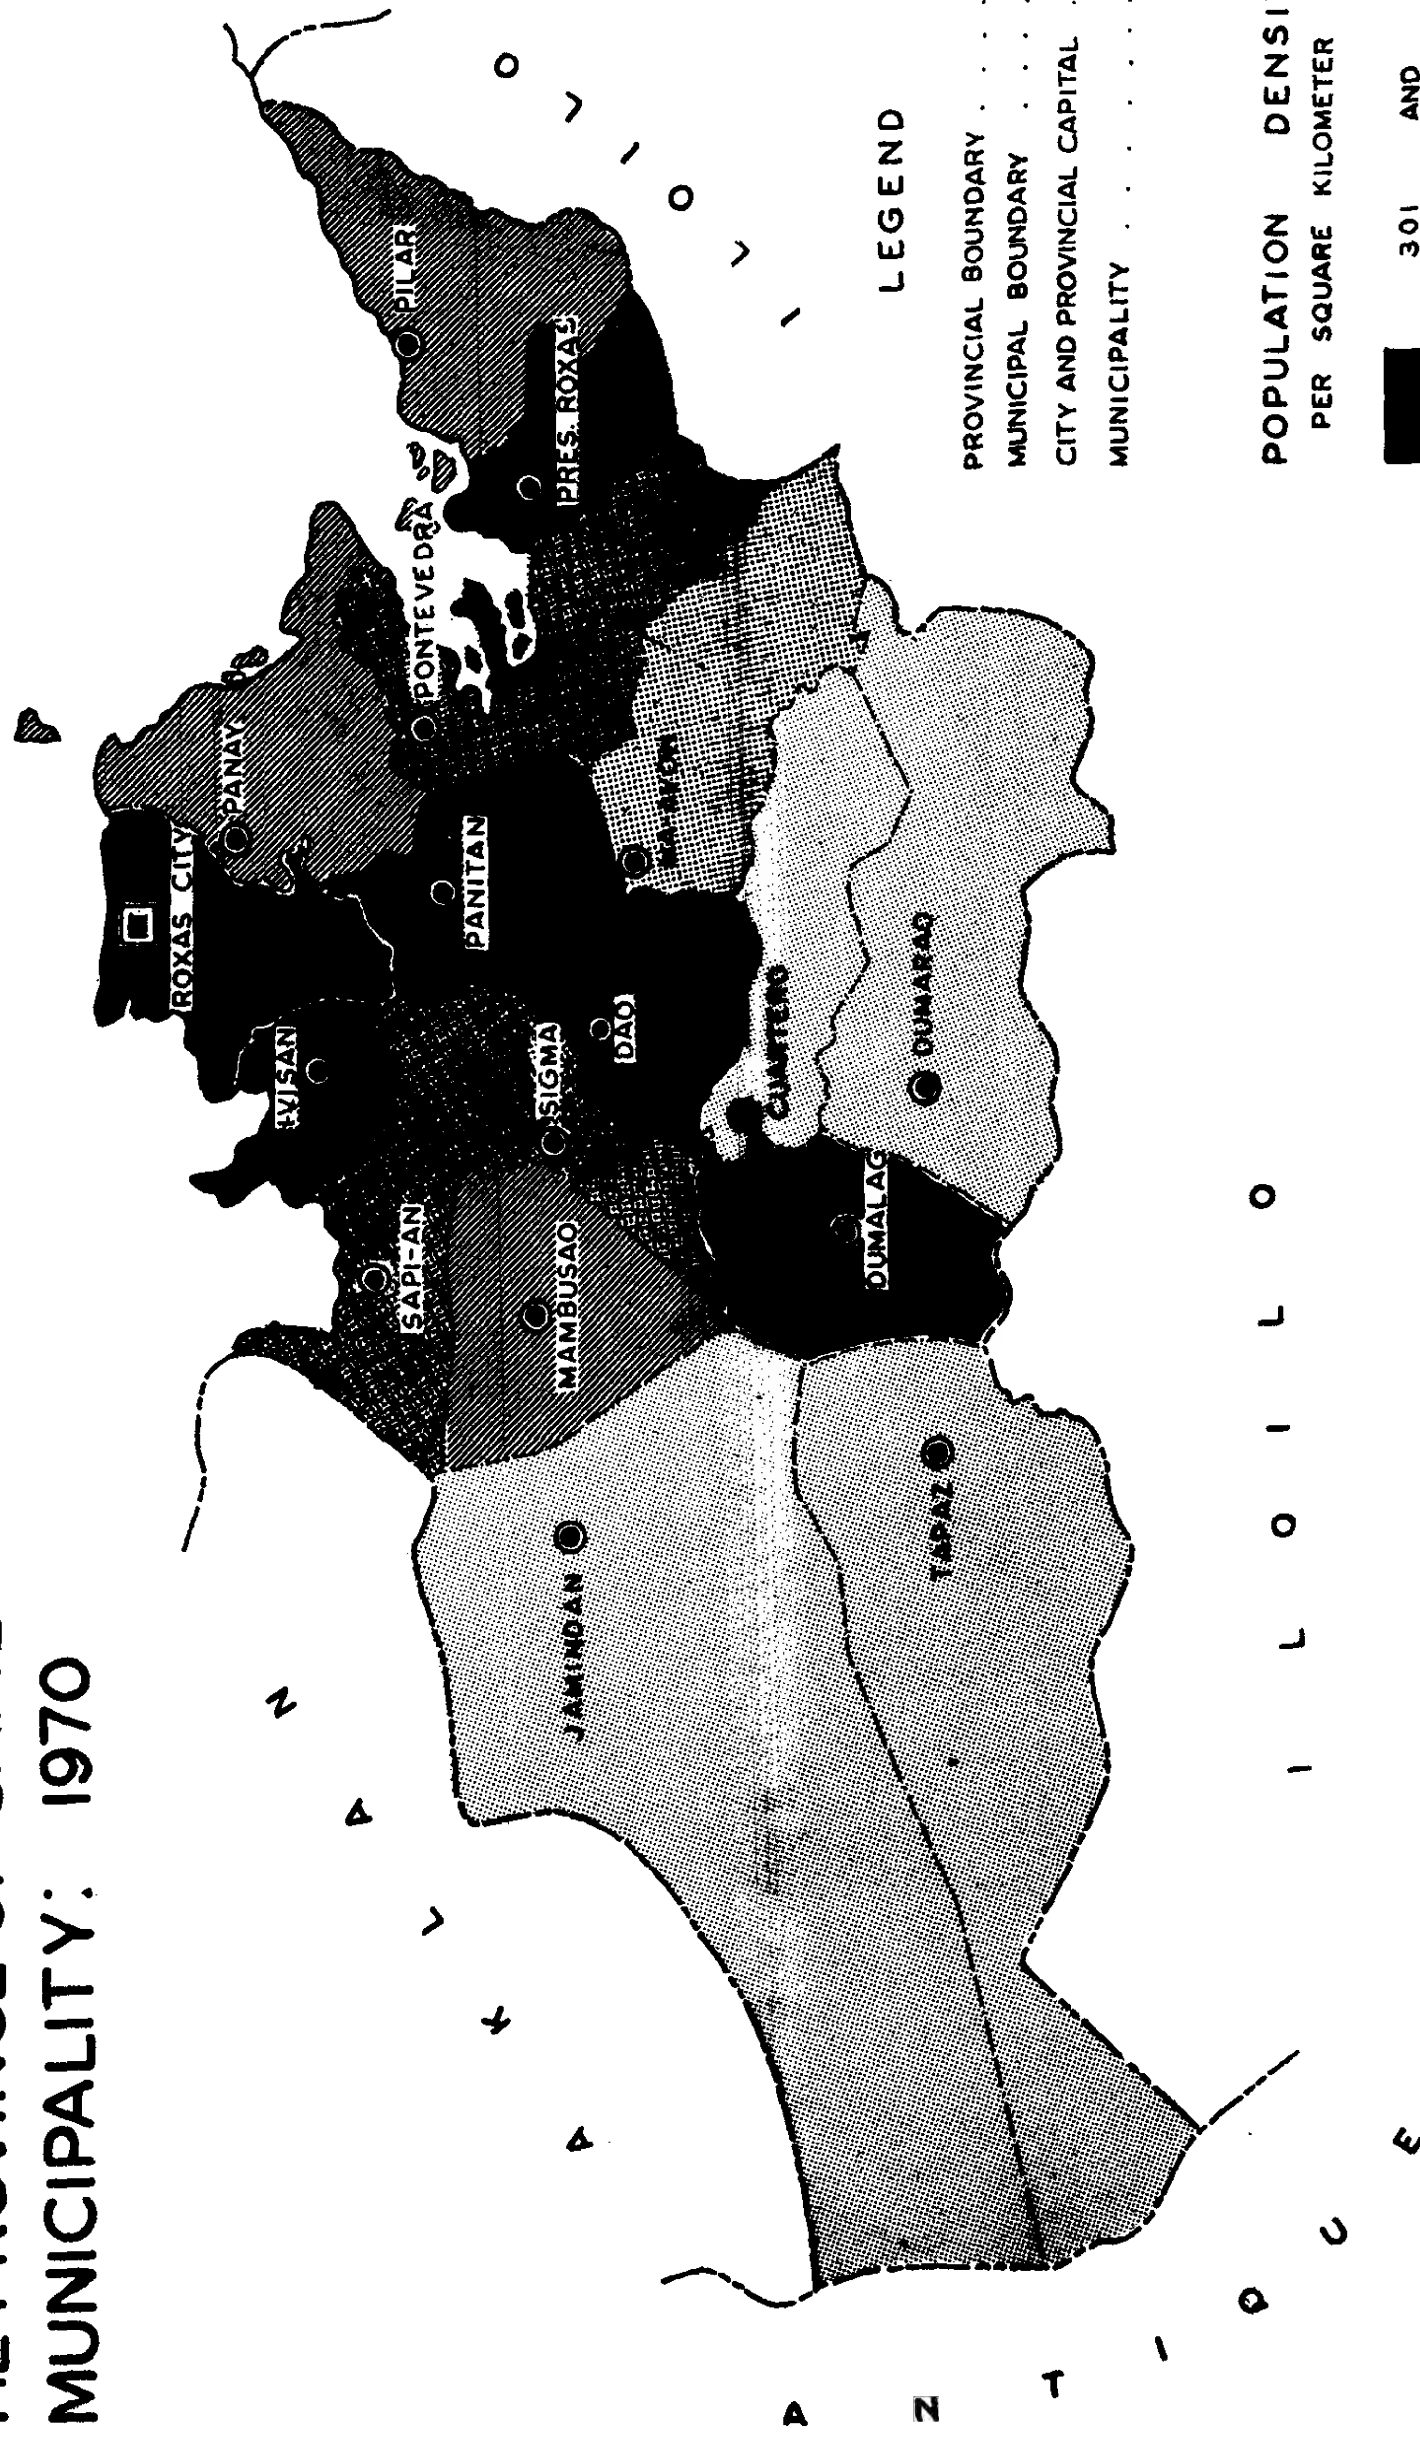

2. Antipolo system or closed pit — is a type of toilet where in water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
3. Open pit system — is a pit which is entirely open or partially covered.
4. Public toilet — is any type of toilet for communal use.

* Table 1-3, Census of Population, gives the name of each barrio. The number near each barrio symbol in the map corresponds to the number and name given for the same barrio for that municipality in said Table.

CAPIZ

INTRODUCTION

One of the four provinces comprising the island of Panay, Capiz is bounded by the Sibuyan Sea on the north, the province of Aklan on the northwest, Antique on the west, and Iloilo on the south and southwest. The northern part of the province is made up mostly of plains while the western part is hilly. The waters adjacent to its coastline which is approximately 80 kilometers long, constitute one of the richest fishing grounds in the Western Visayas region.

Prior to 1716, Capiz, then known as Aklan, was within the jurisdiction of Oton, Iloilo. When Capiz was organized a politico-military province in 1716, its territory included the neighboring islands of Romblon, Maestro de Campo, Tablas and Sibuyan. Civil Government was established in the province on April 5, 1901. A month later Romblon was declared an independent province. Capiz suffered territorial loss on April 25, 1956 when its northwestern portion became the province of Aklan. The former municipality of Capiz, now known as Roxas City, is the provincial capital.

LAND AREA AND POPULATION

The province has a land area of 2,633.2 square kilometers which is 0.9 percent of the total land area of the Philippines. In the 1970 Census it has a population of 394,041 of which 99.5 percent are native born (Table I-6). It ranks number 35 in population, whereas in 1960 it ranked number 34 with its population of 315,079. There are more females than males in the province. For every 100 females there are approximately 95 males. The population density in Capiz is relatively high, with 119.7 in 1960 and 149.6 in 1970, or an increase of 29.9 persons per square kilometer. It exceeds the country's density (122.3) by 27.3. The population of the province grew at a slower rate than that of the entire country. From 1960 to 1970 the population of the Philippines increased by 35.4 percent; that of Capiz, by 25.1 percent. While an annual growth rate of 30.1 percent was registered for the country, Capiz grew at the rate of 2.21 percent. Among the 67 provinces, it ranks number 41 in the rate of population growth between 1960 and 1970.

URBAN-RURAL RESIDENCE

The province is still predominantly rural. Of its total population, 334,358 or 84.8 percent are rural residents. The extent of urbanization is only 15.2 percent, compared to 31.8 percent for the whole Philippines. More than half of those residing in the urban as well as in the rural areas are females. Of the urban population 52.9 percent are females and 47.1 percent are males, while of the rural population, 51.1 percent are females and 48.9 percent are males (Table I-4).

HOUSEHOLDS AND CONJUGAL FAMILY NUCLEI

A total of 66,193 households and 67,573 family nuclei are recorded for the province (Table I-3). On the average, 5.9 per-

sons comprise each household and 5.8 persons, each family nucleus.

AGE COMPOSITION

Capiz has a greater proportion of the youth population than the Philippines, and a lower proportion of persons both in the working ages (age group 15-64) and in the older age group (65 and over). While 43.1 percent of the total Philippine population are in the age group 0-14, 53.4 percent in age group 15-64, and 3.5 percent in age group 65 and over, Capiz has 47.5 percent of its population in age group 0-14, 49.3 percent in age group 15-64, and 3.2 percent in age group 65 and over (Table I-4). The median age of its population is 15.0 years, which is 2.4 years lower than that for the Philippines.

The rural areas have a younger population than the urban areas; 48.3 percent of the rural population belong to the age group 0-14, while only 43.0 percent of the same age group are found in the urban areas. However, the urban areas have a higher proportion of the population in age group 15-64 (53.1%) than the rural areas (48.6%). Moreover, the urban population in age group 65 and over is slightly higher (3.9%) than the rural population in the corresponding age group (3.1%). Since it has a young population, the province has a high dependency ratio. Its dependency ratio is 103 whereas that for the entire country is 87. For every 100 persons in the productive ages (15-64) there are 103 "dependents" in Capiz (Table I-4). The dependency ratio in the rural areas is even higher (106) than the provincial ratio, but lower in the urban areas (89).

ECONOMICALLY ACTIVE POPULATION

The population ten years of age and over comprise more than 270 thousand or 68.6 percent of the total population. Of this number 143,026 or 52.9 percent are economically active. (Table II-1). Among the economically active 91.2 percent are employed and 8.8 percent are unemployed. Only 2 percent are looking for work for the first time. Housekeepers constitute 53.9 percent of those falling under the not economically active category; students, 10.4 percent; and "others", 35.7 percent.

CLASS OF WORKER

Of the 136,908 experienced workers in the province, 46.0 percent are wage and salary workers; 33.8 percent have their own business; and 19.3 percent are unpaid family workers (Table II-3). Private employees comprise 86.6 percent of the wage and salary workers; the rest (13.4%) are government employees.

INDUSTRY

The province is still highly agricultural. Of the economically active population, 66.0 percent are engaged in agriculture, hunting, forestry and fishing. Only 12.8 percent are in services, followed by 8.9 percent in manufacturing, and 4.9 percent in commerce (Table II-6).

The males constitute nearly three-fourths, or 74.8 percent, of those engaged in agricultural activities. Of the total male economically active population, 73.2 percent are working in agriculture, while of the total female economically active population, 44.9 percent are working in the same industrial sector (Table II-1).

OCCUPATION

Majority of the economically active populace are farmers, fishermen, hunters, loggers and related workers (64.5%) by occupation. Craftsmen, production process workers and laborers make up 11.0 percent; service, sport and related workers, 6.6 percent; professional, technical and related workers, 4.9 percent; and sales workers, 4.9 percent. The other occupations comprise 8.1 percent (Table II-12).

NUMBER OF HOURS WORKED

During the reference period, 48.3 percent of the 124,615 employed workers worked for 45 hours and over; 28.8 percent worked for 35 to 44 hours; 10.5 percent, for 15 to 24 hours; and 9.1 percent for 25 to 34 hours. Those who worked less than 15 hours comprise only 2.6 percent (Table II-15).

USUAL OCCUPATION

Classified by usual occupation for the last twelve months, more than half of the economically active population were farmers, fishermen, hunters, loggers and related workers (63.1%), followed by craftsmen, production process workers and laborers (11.1%), service workers (6.8%), professional, technical and related workers (6.2%), and sales workers (4.6%). Put together, the other occupation groups made up 8.2 percent (Table II-19).

MARITAL STATUS

Of the population ten years old and over, 49.0 percent are single, 46.3 percent are married, and 4.2 percent are widowed, with only 0.4 percent either divorced or separated. A greater proportion of the males have never been married, with 51.3 percent, compared to those who are married, which comprise 46.6 percent. Among the females, 46.8 percent are single, while 46.2 percent are married. There is a higher proportion of "widowed" among the females (6.4%) than among the males (1.9%) (Table III.1).

LITERARY AND EDUCATION

Out of 317,122 persons 6 years of age and over, 68.9 percent "know how to read and write" or are literate. The urban areas have a higher literacy rate than the rural areas; 82.6 percent of the urban population are literate, compared to 66.2 percent for the rural population (Table III-4).

Of the population 25 years and over, 59.8 percent have completed elementary education; 8.3 percent, high school education; and 6.8 percent, college education, while 24.8 percent are reported as not having completed any grade at all (Table III-6). School attendance of the population 6 years of age and over reveals 27.7 percent are attending school, with 72.3 percent not attending school (Table III-9). Of the population 6-24 years of age 46.9 percent are attending school. Of those attending school in the 6-24 year age group, a bigger proportion are females (52.0%).

HOLDERS OF COLLEGE DEGREE

For the province 8,233 persons are reported as having earned college degrees. Of this number 5,147 or 62.5% are in the field

of Education, more than two-thirds of which are Bachelor of Science in Elementary Education graduates. The Social Sciences, to which Commerce belongs, comprise only 13.9 percent, followed by the Medical Sciences with 6.5 percent; Engineering, 3.5 percent; Law, 3.4 percent; and the Humanities, 2.6 percent. Only 1.9 percent are in Agriculture; 0.5 percent, Fine Arts; and 0.4 percent, Natural Sciences. About 4.8 percent are holders of unspecified degrees (Table III-10).

DIALECT

Only one principal dialect is spoken in the province. Of its population, 391,632 or 99.4 percent speak Hiligaynon. Tagalog, Cebuano, Aklanon, and Chinese put together constitute only 0.6 percent (Table III-13).

More people in Capiz speak English than Filipino (Tagalog) or Spanish; 35.7 percent of the population speak English, while only 32.7 percent speak Pilipino. Spanish is spoken by only 3.1 percent (Table III-16).

RELIGION

Roman Catholicism is the predominant religion in the province. Out of 394,041 persons, 96.6 percent are Roman Catholics, while 1.5 percent are Protestants. The other religions comprised only 1.9 percent (Table III-19).

FERTILITY

On the average 5.5 children are born alive to ever-married women in the province who have reached the end of their child-bearing period (50 years and over). In the urban as well as in the rural areas, the average number is 5.5. For ever-married women 50 years and over, 6.1 percent have had no children by the end of their reproductive life. The proportion is higher in the rural areas (6.3%) than in the urban areas (5.5%).

The average number of children born to every woman who has already borne at least one child is 4.7 for Capiz province. This holds true for both the urban and the rural areas where the average number of children born is also 4.7 (Table IV-1).

Majority of the ever-married women in Capiz were married at the age of 25. More than half (58.9%) of the 82,254 ever-married women in the province were married by the age of 20, and 88.6 percent, by age 25 (Table IV-7).

MIGRATION

Of the total population of the province 341,134, or 86.6 percent, live in the same municipality where they were born; 27,906, or 7.1 percent, reside in municipalities other than the municipality of birth, but in the same province; and 5.8 percent were born in other provinces (Table IV-9).

Out of 270,687 persons comprising the population ten years and over, 91.2 percent are still residing in the same municipality where they were residents in 1960, while 4.0 percent were living in other municipalities within Capiz province, and 4.4 percent were residing in other provinces (Table IV-11).

CAPIZ — HOUSING

NUMBER OF DWELLING UNITS

Nearly 66 thousand dwelling units are reported for the province, of which 65,286, or 99.0 percent are occupied and only 667, or 1.0 percent, are unoccupied. Most of the dwelling units are single houses (91.5%), while 6.4 percent are "barong-barong"

structures. A few are duplex structures (1.2%), apartments/accessories (0.5%), and commercial buildings (0.4%).

More than four-fifths (85.9%) of the 65,953 dwelling units in Capiz are located in the rural areas and less than one-fifth (14.1%), in the urban areas (Table 1). Single houses (92.1%) and "barong-barong" structures (6.8%) are more common in the rural than in the urban areas, with 87.9 percent and 3.8 percent, respectively. On the other hand, 3.2 percent of the urban dwelling units are duplex structures; 2.9 percent, apartments/accessories; and 2.2 percent, commercial buildings, whereas in the rural areas, the same types put together comprise only 1.1 percent.

TYPE OF CONSTRUCTION MATERIAL OF ROOF AND WALL

The materials used in the construction of the roof vary from strong to light, with the latter predominating. While 85.1 percent of the dwelling units are in structures with roof of light materials (nipa or cogon), only 14.7 percent are in structures with roof of strong materials (aluminum, galvanized iron, asbestos, tile or concrete). The strong materials frequently used are aluminum and galvanized iron, accounting for 14.3 percent, while of the light materials, nipa constitutes 66.1 percent (Table 2).

A similar trend is observed in the type of construction materials of the wall; 86.8 percent of the total number of dwelling units have walls of light materials and 12.6 percent, of strong materials. However, a much higher proportion of dwelling units in structures with walls of light materials are found in the rural areas (90.3%) than in the urban areas, which is only 65.5 percent.

TYPE OF TENURE

Most of the dwelling units in the province (95.8%) are owner-occupied (including owned and a part rented out, and owned and a part occupied free by others), with the rented comprising only 1.4 percent and the occupied rent-free, 2.8 percent (Table 3). Owner-occupied dwelling units constitute 90.6 percent in the urban areas and 96.6 percent in the rural areas. Correspondingly, there is a higher proportion of rented dwelling units in the urban (6.4%) than in the rural (0.6%) areas.

YEAR OF CONSTRUCTION

Three-fifths, or 60.4 percent, of the structures containing dwelling units were built during 1965-1970; one-third, or 33.4 percent, during 1955-1964; and only 5.4 percent, during 1945-1954 (Table 4). Very few were constructed during 1942-1944 (0.3%) and before World War II (0.5%).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

A greater percentage (97.4%) of the dwelling units in Capiz are each occupied by one household than by two households (2.2%). Dwelling units containing only one household comprise 95.0 percent in the urban areas and 97.8 percent in the rural areas (Table 5).

NUMBER OF ROOMS

The number of rooms in each dwelling unit varies from one to eight, but most have one to three rooms. Of the 65,286 occupied dwelling units, 29.0 percent have only one room; 31.2 percent, 2 rooms; and 23.9 percent, 3 rooms. About one-tenth, or 9.8 percent, have 4 rooms; 3.7 percent, 5 rooms; and 1.3 percent, 6 rooms. Less than one percent (0.5%) have 7 rooms and 0.6 percent, 8 or more (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR

Of the 66,193 households in the province, less than half (46.0%) have radios, while only 0.1 percent have television sets and 1.4 percent, refrigerators (Table 9). Three-fifths (59.9%) of the urban households own radios; 7.1 percent, refrigerators; and 0.2 percent, television sets. In comparison, 43.7 percent of the rural households are with radios; only 0.5 percent are with refrigerators and 0.1 percent, with television sets.

LIGHTING FACILITIES

Kerosene is widely used for lighting in Capiz. More than nine-tenths, or 93.6 percent, of the total number of households use kerosene, while only 5.1 percent use electricity. "Others" (1.0%) and oil (0.3%) are rarely used. A greater proportion of households in the rural areas (96.8%) use kerosene, compared to their urban counterparts with 79.6 percent. One-fourth of the urban households use electricity, whereas only 1.6 percent of the rural households use it (Table 11).

WATER SUPPLY

Majority of the households (70.5%) depend upon the open well for their water supply. Rain water is used by 9.2 percent; piped water, by 5.8 percent; the pump, by 5.5 percent; spring, by 3.9 percent; and the artesian well, by 3.3 percent. Few households (1.8%) use lake, river, stream, etc., as their source of water supply. While more than three-fourths (76.7%) of the rural households use the open well, less than one-third (32.6%) of the urban households use it. More households in the urban areas use rain water (24.6%), piped water (18.1%), the pump (16.8%), and the artesian well (7.0%) than those in the rural areas. Of the rural households only 6.6 percent use rain water; 3.9 percent, piped water; 3.7 percent, the pump; and 2.7 percent, the artesian well. However, 4.4 percent use spring compared to only 0.6 percent of the urban households (Table 13).

COOKING FUEL

Wood is still commonly used as cooking fuel, with 91.1 percent of the total number of households using it. About 5 percent (4.6%) use kerosene; 2.5 percent, gas (liquefied petroleum); and 1.5 percent, "others". An insignificant 0.2 percent use charcoal and 0.1 percent, electricity (Table 14). The biggest users of wood are found in the rural areas (93.4%), with 77.3 percent in the urban areas using the same type of cooking fuel. Kerosene is used by 10.7 percent of the urban households and gas, by 9.6 percent. In the rural areas only 3.6 percent of the households use kerosene and 1.4 percent, gas.

TOILET FACILITIES

By type of toilet facilities, 45.7 percent of the provincial households have the open pit; 25.9 percent, the antipolo or closed pit; and 5.2 percent, the flush or water-sealed type. Less than one percent (0.7%) use the public toilets while 22.6 percent are without toilet facilities. Compared to those in the rural areas, households in the urban areas have better toilet facilities. Over two-fifths (45.1%) of the urban households have the antipolo or closed pit; 22.7 percent, the open pit; and 21.8 percent, the flush or water-sealed, while only 0.5 percent use the public toilets. Half of the rural households (49.5%) use the open pit; 22.8 percent, the antipolo or closed pit; 2.4 percent, the flush or water-sealed; and 0.8 percent, the public toilets. One-tenth (9.9%) of the households in the urban areas are without toilet facilities, which is much lesser than those in the rural areas, with 24.5 percent (Table 15).

AGE-SEX COMPOSITION OF THE URBAN AND RURAL POPULATION OF THE PROVINCE OF CAPIZ: 1970
